- Slicing UI, integrating APIs that are related with students, instances, exam, assessment, questions and answers.
- Tech stack: Reactjs, Redux, Tailwindcss, daisyUI, React Query, Gitlab.

Hacksprint • 1000 Startup Digital Kominfo RI

September 2023 - October 2023 | Jawa Barat, Indonesia

- Designing a solution sprint to find solutions based on user pain problems.
- Conduct market research to determine market segmentation and early adopters.
- Graduated as the top 10 Hacksprint startups in the West Java region.

Frontend Developer • Jobhun

June 2023 - September 2023 | Remote

- Develop and maintain Jobhun's main website by collaborating with backend developer and product designer.
- Ensures user interface compatibility with various devices and browsers.
- Slicing UI, integrating APIs that are related with data experts, mentors, filter options, and fixing bugs.
- Tech stack: Vuejs, Tailwindcss.

Business Incubation Program 2022 • Bandung Techno Park

June 2022 - March 2023 | Bandung, Indonesia

- Participate in business incubation program called BTPIP with the startup name SportGather which is well facilitated by BTPIP for the initial journey in developing startup.
- Developed SportGather Venue, an MVP product that is used to book sports facility schedules for customers. The tech stack used is Reactjs and Tailwindcss.

Co-leader Web Development Division • Central Computer Improvement

January 2022 - January 2023 | Telkom University

- Provide materials on frontend web development for study groups.
- Make a study group activity report.
- Managing Instagram feeds related to web development and technology.

Member of Software Development Division • ESD Laboratory

September 2021 - January 2023 | Telkom University

- Learn about web programming, algorithms, git, etc.

Software Engineer • Proclub Telkom University

November 2021 - December 2022 | Telkom University

- Study groups and practice together on software engineering topics.
- Learn about software engineering, programming paradigm, clean code, etc.

Skills

HTML, CSS, Javascript, ES6, Reactjs, Nextjs, Redux, React Query, SCSS, Tailwind CSS, DaisyUI, Git.

Projects

Guru Bintang

https://gurubintang.vercel.app/

MVP product for the development of education and skills for honorary teachers as a condition for the Proclub Telkom University probation phase 2021.

- Responsible for the frontend, such as slicing UI, making some features like user auth, CRUD courses, print certificate, and basic e-learning courses.
- Tech stack: Reactjs, SCSS.

Trading Watcher

Trading watcher is a private dashboard created to monitor and adjust crypto coins according to user needs.

- Responsible for the frontend, such as slicing UI, API integration, CRUD of watcher and alert coins, and logs.
- Optimizing and maintaining website with optimal resource utilization.
- Tech stack: Reactjs, SCSS.

Dies Natalis Web Platform

https://unpad-project.vercel.app/

An anniversary web platform for the Association of Physics Departments, Padjadjaran University.

- Responsible for the frontend, such as slicing UI, making some features like stages page, exhibition page, embedded live-streaming & live chat YouTube.
- Tech stack: Reactjs, Tailwindcss, SCSS.

Weatherio App

https://weatherio.vercel.app/

An API based web apps to track and search for weather info in different cities.

- Tech stack: Reactjs, SCSS.
- API: openweather, locationiq.

TV Maze UI

https://vue-tvmaze-api.vercel.app/

An API based website to display tv programs using TVMaze API as an internship challenge assignment.

- Tech stack: Vuejs, CSS.
- API: TV Maze.

Certifications

Certified Web Developer

BNSP (Badan Nasional Sertifikasi Profesi) | 2026

- Professional certificate in the field of programming and software development issued by BNSP.
